AUTOMOTIVE PROJECTS PROFILE

Grace Construction is a full-service Commercial Construction Management, Design Build, and General Contracting Firm, based in Moorestown, NJ.

At Grace Construction, our integrated approach to construction management takes the stress out of building so you can focus on growth.

Our Process:

Grace Construction Management Company believes that planning ahead is the only way to get things done right. We guide our clients with services ranging from overall planning, coordination, logistics, control, budgeting, and scheduling of projects from start to finish.

From early development to completion, a member of our experienced Estimating, Project Management, Support, and Field Team will coordinate and oversee every aspect of the project, including communications with the client, architects, engineers, municipal officials, and supervision of all subcontractors.

"From small renovations, to complete renovations, to ground up construction, Grace has exceeded our lofty expectations with consistent professionalism, speed and competency."

- LESTER GLENN AUTO GROUP

Trusted By:

Automotive Projects

Grace Construction Management has completed dozens of automotive projects and completes \$130+ million annually.
