

Lester Glenn

# AUTOMOTIVE CASE STUDY

## CLIENT & SECTOR

Lester Glenn Hyundai, a premier automotive dealership in Toms River, NJ, known for exceptional sales and service experiences.

## CHALLENGE

The dealership required a \$10 million, 37,676 sq. ft. renovation to modernize its facilities, improve efficiency, and elevate the customer experience. Goals included upgrading façade market presence, showroom aesthetics, creating temperature-controlled service bays, and integrating advanced equipment to boost daily service capacity.

## APPROACH & EXECUTION

A comprehensive demolition and renovation plan focused on enhancing customer-facing spaces and operational areas to align with Lester Glenn Hyundai's premium brand image. Regular coordination with dealership leadership and contractors ensured seamless communication, milestone tracking, and alignment with client expectations.

## TECHNOLOGY & TOOLS

- Rytec High Speed Doors for efficient service bay access and improved workflow.
- Rooftop HVAC Systems for temperature-controlled service areas, increasing comfort and capacity.
- Upgraded showroom, service bay, and sales floor to enhance aesthetics and customer satisfaction.
- State of the Art Service Writer Stations & Service Drive-Thru experience
- Re-Imaged & Re-Branded Façade to meet new Manufacturer Standards & Appearance

Grace Construction Management has proudly partnered with Lester Glenn Automotive Group on 12+ projects nationwide, representing over \$100 million in total projects completed. This collaboration underscores Grace's expertise in delivering impactful renovations for leading automotive brands.

"From small renovations, to complete renovations, to ground up construction, Grace has exceeded our lofty expectations with consistent professionalism, speed and competency."
